AC Filter 2-Stage, Very High Symmetrical and Asymmetrical Attenuation

		See below: Approvals and Co	mpliances				
Description - Line-filter in standard version - 2 stage - high attenuation		Characteristics Designed for increased requirements - 2-stage line filter with increased attenuation Protection against interference voltage from the mains - Especially designed for industrial applications such as: Frequency Converters, Stepper Motor Drives, UPS-Systems, Inverters Especially suitable for use in switching power supplies - Suitable for use in equipment according to IEC/UL 62368-1

Approvals and Compliances

Detailed information on product approvals, code requirements, usage instructions and detailed test conditions can be looked up in Details about Approvals

SCHURTER products are designed for use in industrial environments. They have approvals from independent testing bodies according to national and international standards. Products with specific characteristics and requirements such as required in the automotive sector according to IATF 16949, medical technology according to ISO 13485 or in the aerospace industry can be offered exclusively with customer-specific, individual agreements by SCHURTER.

Approvals

The approval mark is used by the testing authorities to certify compliance with the safety requirements placed on electronic products. Approval Reference Type: FSW2
